

CANOEING ADVENTURE AND OVERNIGHT STAY AT HUMLETORK

THE COUNTRY'S ONLY PRESERVED hop drying facilities are located outside the village of Näsrum in northeastern Skåne, south Sweden. Today the place is a popular café and hostel during the summer months. Visitors can enjoy the fantastic view of fields and forests as well as the village from the porch. This will be your home base for the coming days while you discover the beautiful and exciting surroundings of the Ivösjö area – which is part of a still widely unknown cultural landscape in Skåne with lots of natural beauty.

Equipped with canoes from Wetlandi you can explore both lakes and rivers. Paddling the river Holjeån gives you a tropical experience. Time seems to stand still here. On lake Ivösjön, the biggest and most beautiful lake in Skåne, you can enjoy the sun, go for a swim and have picnic at one of the many small islands.

You even find trails for hiking or biking in the area.

PADDLING THE HOLJEÅLEDEN, a canoe trail, is an exciting adventure suitable for all those who enjoy life a little extra. It doesn't matter if you are an absolute beginner or a canoe veteran, young or old, a couple or a family. The canoe tour starts at the village Näsrum by the river, and meanders in a deep trench through the landscape. There are no rapids and you do not need to carry the canoe on foot. At the end of the trail you find Humletorkan, the old hop drying facilities. After having reached your final destination you leave the canoes there. The hostel is only a short walk away. There are two barbecue sites with benches and tables along the river.

THE ARCHIPELAGO OF LAKE IVÖSJÖN offers a multitude of islands and is where you are headed next. On the mainland you find public beaches along the coastline, but even many of the small islands have hidden beaches where you can sunbathe and swim. On some islands you may find areas with tables, benches and barbecue sites as well as two shelters.
